Mid C19 villa of London stock brick, formerly a farmhouse, with later additions and outbuildings to the rear. The house has been vacant for many years and has suffered from the effects of water ingress, blocked rainwater goods, vegetative growth, broken windows and rotten joinery. The building is now secured, and Historic England and the Local Authority have identified urgent works needed to arrest further decline whilst a decision is made on the future use of the building.

Small Victorian Gothic stuccoed cottage of one storey and an attic, with a steep-pitched roof of fishscale tiles with large boarded gable ends. The building has been empty and neglected for many years and part of the building has now been subject to unauthorised demolition works. The Local Authority has undertaken extensive works to secure and protect the building under enforcement regulations. Steps are now being taken to ensure appropriate consents are obtained, and full repair of the building secured.

Late C18 house with early C19 extension in similar style, with an elliptical entrance hall. Formerly used as a college, it is now vacant whilst a new use is secured. Water ingress, now halted, has led to outbreaks of dry rot, and vegetation growth has hampered ventilation and drainage to the building. The building was sold in 2020. The Local Authority and Historic England are working with the new owner to bring forward a suitable proposal to secure its future. Some works have been carried out but further works are needed to stabilise the building.

C12 in origin, largely rebuilt in the C15 and clad in brick in 1772. Restored in 1855 and 1871 by Ewan Christian and in 1889 by William Gillbee Scott. The church has a Kentish ragstone medieval tower, 1772 brick-faced east and north sides, and stone south and west sides. The church was awarded a grant from the National Lottery Heritage Fund for repair works to the tower which were completed in early 2016. The nave and aisle roofs are in need of re-covering. A fall of stone internally necessitated general investigations and temporary holding repairs until a scheme of work can be prepared.

The church and tower have C12 origins, were extended in C15 and C16 (Sir Thomas Lovell), repaired in C18, and restored in C19 (including all new roofs) by variously Lochner, St Anbyn and Scott. It is built of rubble masonry including brick and flint with stone quoins and window dressings. There are fine C15 and C16 monuments but these are deteriorating due to dampness caused by poor drainage. The leaking tower roof has caused a structural failure in the belfry. Holding repairs are in place and the Parish is seeking funding for a comprehensive development and repair project.

Early C18 formal gardens associated with Broomfield House, comprising a walled enclosure focussed on a series of formal lakes, and set within a landscape park. Converted for use as a public park in the early C20, with input from Thomas Mawson. The lakes are in poor condition and the historic parkland has suffered losses to development. The house and stable block are in very bad condition and further work is being carried out to help inform a decision on the future of the buildings. A Conservation Management Plan exists for the landscape and discussions are needed to secure its implementation.

Late C18 landscape park and lake by Humphry Repton, extended in the mid-C19 and laid out as a public park in the early C20 by Thomas Mawson. The mansion and immediate grounds are now a private hospital. The divided ownership of the park between the Local Authority, Thames Water and the hospital has led to differential management regimes. The sports area is in very bad condition with intrusive fencing and redundant structures. A Conservation Management Plan requires completion and discussions are needed in order to then secure its implementation.

Late C18 landscape park further developed in the early C20 by Sir Philip Sassoon. Developers are implementing their approved scheme for improvements to the core of the historic landscape around the mansion house. There remain significant issues in the surrounding parkland, owned and managed by the Local Authority as a country park. Discussions continue towards improving the inter-relationship between the wider park and the historic core, and improvements are sought to the management of the parkland and water bodies more generally.

OWNER TYPE:	Local authority
LIST ENTRY NUMBER:	I001357

Mid-to-late C18 pleasure grounds overlying C17 formal gardens focussed on Forty Hall, built 1629-36 for Sir Nicholas Rainton, and set within a C18 landscape park developed over a C16 royal palace and associated water gardens. Owned and managed by the Local Authority as a country park, with the Home Farm and ferme ornée to the west (outside of the registered area) leased to a horticultural college. Numerous issues affect the site, particularly lapsed woodland and grassland management which threatens the character and legibility of the designed landscape and the condition of individual features.
