Public Document Pack

LONDON BOROUGH OF ENFIELD

AGENDA FOR THE COUNCIL MEETING TO BE HELD ON TUESDAY, 19TH MARCH, 2024 AT 7.00 PM

THE WORSHIPFUL THE MAYOR AND COUNCILLORS OF THE LONDON BOROUGH OF ENFIELD

Please Reply to:

Nicola Lowther Governance Manager

Dear Councillor,

You are summoned to attend the meeting of the Council of the London Borough of Enfield to be held at the Civic Centre, Silver Street, Enfield on Tuesday, 19th March, 2024 at 7.00 pm for the purpose of transacting the business set out below.

Yours sincerely

Terry Osborne

Director Law & Governance

5. THE LOCAL PLAN (Pages 1 - 28)

Council is asked to agree the Local Plan.

Appendix D

Tall buildings maps	550
D.1 Height definition maps	55
D.2 Tall buildings locations maps	562
D.3 Industrial tall buildings locations maps	 57

Appendix D

TALL BUILDINGS MAPS

TALL BUILDINGS MAPS

ENFIELD DRAFT LOCAL PLAN **REGULATION 19 MARCH 2024**

The following appendix contains detailed maps showing the boundaries of the tall building areas of policy DX.

The areas are split into following sections:

- Height definition maps
- Tall buildings locations maps
- Industrial tall buildings locations maps

Each drawing is organised according to geographical proximity of areas.

D1. HEIGHT DEFINITION

Borough Wide Definition Map

This map has been produced in line with policy D9 of the London Plan, which requires boroughs to provide local definitions of what constitutes a "tall building", applying an effective minimum height of 21m.

Enfield is a predominantly low rise borough (typically 2-4 storeys). Therefore, for the majority of the borough, the definition of a "tall" is any part of the building (including roof plant) at 21m or above. Areas where the local context warrants a different definition are spatially defined here.

This map only describes what height is defined as a "tall" for the purposes of applying tall building policies. It does not set out where tall buildings are considered appropriate, nor does it imply that heights up to the definition will

Notes

These diagrams do not infer an acceptable scheme in terms of townscape and a scheme specific analysis must be undertaken.

Acceptability in terms of impact on listed building and any conservation areas area not implied here.

Areas prepared in line with the 2021 London Plan Policy D9 B requirements.

All proposals must address the requirements of 2021 London Plan Policy D9. Accordance with these requirements are not implied by these areas and must be assessed on a case by case basis.

These diagrams only show areas where the threshold for "tall" is locally defined.

D2, D3. TALL BUILDING LOCATIONS

Borough Wide Locations Map

This map shows the proposed areas that could potentially accommodate tall buildings with all other areas being inappropriate. This does not preclude the assessment process required for tall buildings and proposals will still have to adhere to a high standard of design. This map if for information only. Policy maps are shown in each sub area. be acceptable.

INTERPRETATION

GUIDANCE FOR AREAS

These diagrams suggest how the areas potentially appropriate for tall buildings can be interpreted. These are indicative and seek to explain that the tall buildings should be contextual and informed by their surroundings both in terms of visual impact, urban design and practicality.

Key

Height sensitive edge

Maximum Height in Meters

Lower Maximum Height (Linear Zones only)

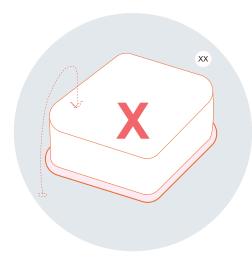

Examples of potential responses to the zone. Uniform height across the zone is not acceptable

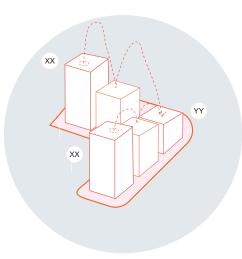

Height increases with direction of arrow. Uniform height across the zone is not suggested

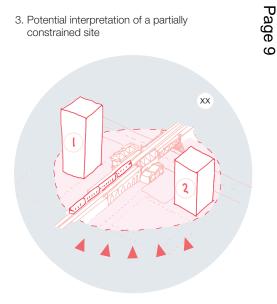

4. Uniform height - Incorrect Interpretation

2. Potential interpretation of a partially constrained site

5. Linear Tall Building Zone

3. Potential interpretation of a partially constrained site

6. Tall Building Point

AREA 1

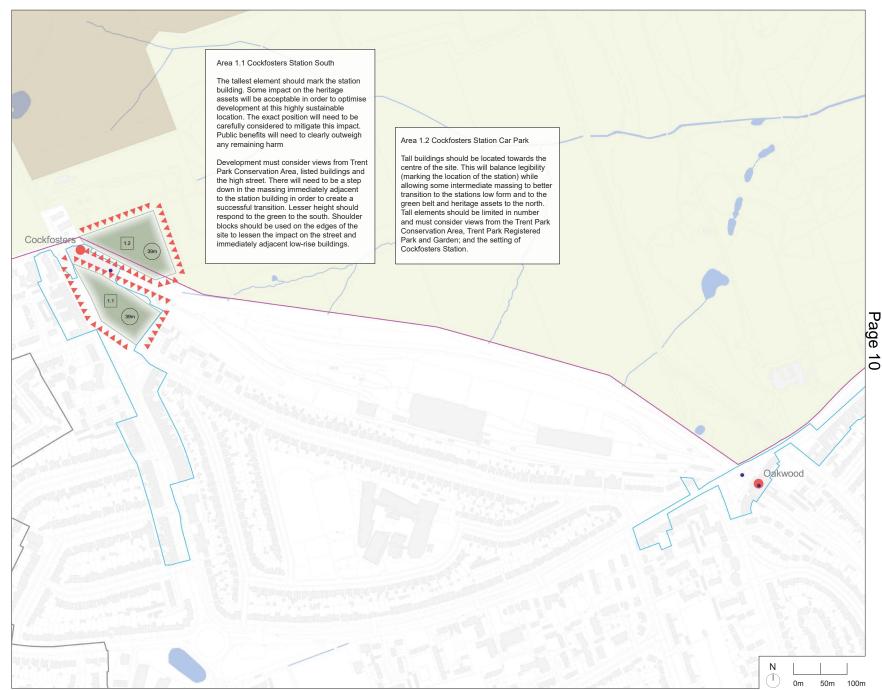

Notes

This map has been produced in line with policy D9 of the London Plan (2021), which requires boroughs to identify "locations where tall buildings may be an appropriate form of development". It only describes where tall buildings are potentially appropriate. Areas not marked as potentially appropriate are not suitable for tall buildings. Please check the Tall Building Definition Map for what constitutes a Tall Building for the purposes of applying tall buildings policies.

Please refer to Policy DE6: Tall Buildings, which contains important information on the interpretation of these maps and the criteria to be applied to all proposals for tall buildings. In addition, all proposals must address the requirements of London Plan (2021) Policy D9 (and its successors). Accordance with these requirements are not implied by these areas and must be assessed on a case by case basis.

These diagrams do not infer an acceptable proposal in terms of townscape or impact on heritage assets. A proposal-specific analysis must be undertaken in accordance with other policies in the development plan.

AREA 11 MERIDIAN WATER

ENFIELD DRAFT LOCAL PLAN **REGULATION 19 MARCH 2024**

Policy Wording

In lieu of space on drawing.

Area 11.01 Meridian East

Tall buildings are appropriate in this area to provide an appropriate density between the other, taller, tall buildings areas.

Area 11.02 Meridian One North

Tall buildings could be located along the railway, responding to the presence of the railway and proximity to the station. Tall buildings should be positioned along the railway (thereby distinct from the station cluster) and height should increase towards the station.

Area 11.03 Meridian Water Station

A cluster of tall buildings should mark the presence of the station on both sides of the railway. This should form the visual and townscape focus for height in the area, clearly marking the presence of this important transport hub.

The tallest buildings should be immediately adjacent to the station, with height decreasing with distance from it.

Tall buildings should have clear space between them help to avoid creating a wall of development and a lower heights should be used elsewhere to create human-scale streets.

Area 11.04 Angel Edmonton Road South

Tall buildings can be located along both sides of Angel Road, to respond to the scale of the infrastructure and mark the route to the station.

There should only be tall buildings lining the route, not deeper into the site. Tall buildings should have clear space between them help to avoid creating a wall of development and a lower shoulder height to step down to street level.

There should be a variety of heights along the route, generally increasing towards the station.

A small cluster of tall buildings could be accommodated around the junction of Angel Edmonton and Leeside Roads to respond to the scale of the junction and mark the route to the station. Height should be focussed on the junction and not extend back into the site.

Area 11.05 Meridian Phase 1

Tall buildings are appropriate in this area to help build up towards the high point at the station. They should step down to the low rise context to the west.

Area 11.06 Retail Store Site

Appendix D

A small cluster of tall buildings should be located around the junction of Glover Drive and Angel Edmonton Road. This will highlight this important junction, the route to the station and respond to the planned civic space at this location.

Tall buildings should be grouped around the junction and open space only and be arranged with intermediate heights that create a human scale public realm.

Area 11.07 Causeway Meridian West

Tall buildings are appropriate along the central spine road. As well as hosting an array of planned retail, civic and employment uses, this is a major route through Meridian Water, providing access to all residential neighbourhoods, and linking the station to the central park at the confluence of the brooks as well as employment uses and the Lee Valley Regional Park in the east.

Buildings should be positioned to take advantage of corner locations, vistas and proximity to open space. They will need to be spaced to avoid creating a wall of development and include aesthetically pleasing variations.

There should only be tall buildings lining the route, not deeper into the site. Intermediate massing should be used to help create a human scale along the street.

Page

2

ENFIELD DRAFT LOCAL PLAN **REGULATION 19 MARCH 2024**

Policy Wording

In lieu of space on drawing.

Area 11.08 Meridian Two

A small cluster of tall buildings is appropriate at the southern end of the new park. This will mark the location of the new bridge over the brooks, as well as respond to the large open space. The height should, in particular, mark the location of the bridge and take advantage of views over the park.

Area 11.09 Meridian West North

Tall buildings are appropriate in this area to provide an appropriate density between the other, taller, tall buildings areas.

Area 11.10 North Circular Frontage

Tall buildings could be located along the North Circular Road to respond to the scale of the infrastructure and help block noise and pollution to the rest of the development to the south.

There should only be tall buildings lining the route, not deeper into the site. Tall buildings should have clear space between them help to avoid creating a wall of development.

Area 11.11 Central Confluence

A small cluster of tall buildings is appropriate where the spine road crosses the new park. This will mark the location of bridges over the brooks, respond to the large open space and signal the presence of commercial and civic uses.

Area 11.12 Central North

A small cluster of tall buildings should be located around the canal-side square. This square will contain a number of commercial uses, as well as marking the location of the watercourse and bridge across it.

Tall buildings should be grouped around the open space only and be arranged with intermediate heights that create a human-scale public realm.

Area 11.13 Meridian West South West

Tall buildings are appropriate in this area to provide an appropriate density between the other, taller, tall buildings areas.

Area 11.14 Causeway Meridian East

Tall buildings are appropriate along the central spine road. This section is further from the station and will likely not contain as many high street and civic uses, therefore the appropriate height is lower than elsewhere. However, this is still an important route, providing access to significant employment opportunities and linking the station to the Lee Valley Regional Park in the east.

Buildings will need to be spaced to avoid creating a wall of development and include aesthetically pleasing variations. There should only be tall buildings lining the route, not deeper into the site. Intermediate massing should be used to help create a human scale along the street.

Area 11.15 Meridian One Western Fringe

Appendix D

Tall buildings are appropriate in this area to help build up towards the high point at the station. They should step down to the low rise context to the west.

AREA I1 SE ENFIELD

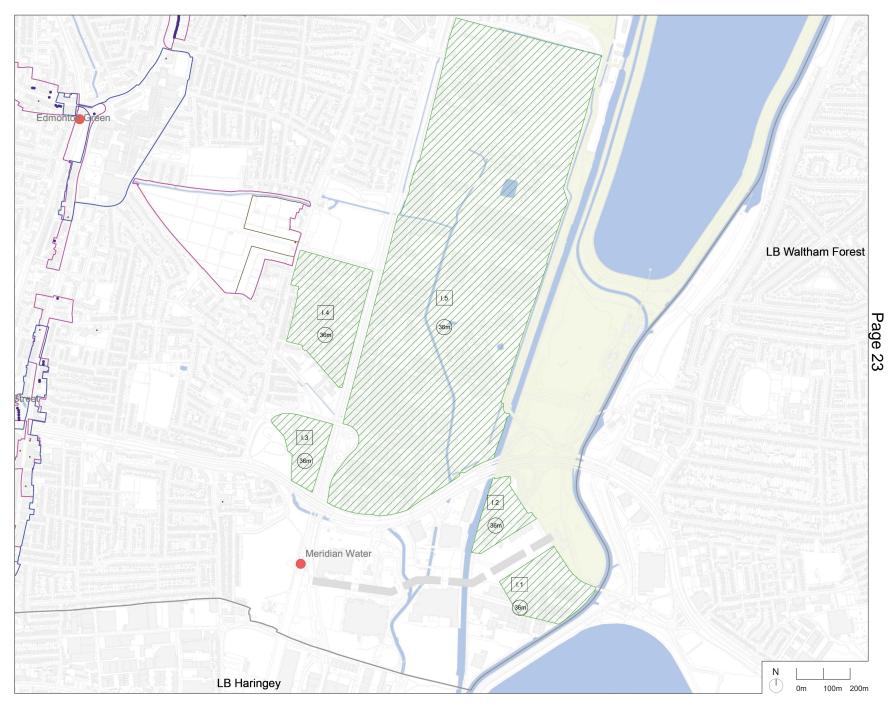

Notes

This map has been produced in line with policy D9 of the London Plan (2021), which requires boroughs to identify "locations where tall buildings may be an appropriate form of development". It only describes where tall buildings are potentially appropriate. Areas not marked as potentially appropriate are not suitable for tall buildings. Please check the Tall Building Definition Map for what constitutes a Tall Building for the purposes of applying tall buildings policies.

Please refer to Policy DE6: Tall Buildings, which contains important information on the interpretation of these maps and the criteria to be applied to all proposals for tall buildings. In addition, all proposals must address the requirements of London Plan (2021) Policy D9 (and its successors). Accordance with these requirements are not implied by these areas and must be assessed on a case by case basis.

These diagrams do not infer an acceptable proposal in terms of townscape or impact on heritage assets. A proposal-specific analysis must be undertaken in accordance with other policies in the development plan.

AREA 14 PONDERS END

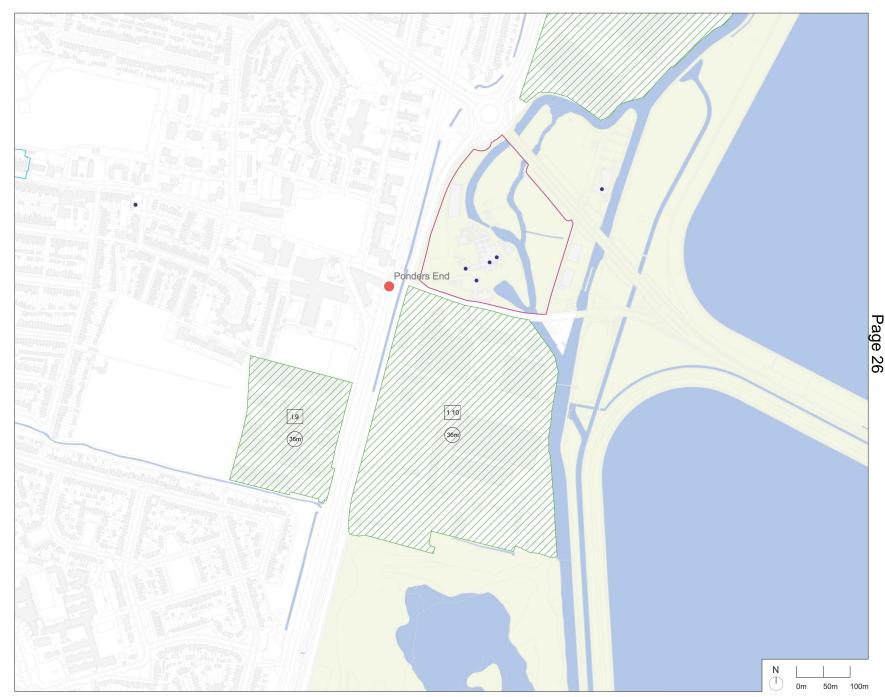

Notes

This map has been produced in line with policy D9 of the London Plan (2021), which requires boroughs to identify "locations where tall buildings may be an appropriate form of development". It only describes where tall buildings are potentially appropriate. Areas not marked as potentially appropriate are not suitable for tall buildings. Please check the Tall Building Definition Map for what constitutes a Tall Building for the purposes of applying tall buildings policies.

Please refer to Policy DE6: Tall Buildings, which contains important information on the interpretation of these maps and the criteria to be applied to all proposals for tall buildings. In addition, all proposals must address the requirements of London Plan (2021) Policy D9 (and its successors). Accordance with these requirements are not implied by these areas and must be assessed on a case by case basis.

These diagrams do not infer an acceptable proposal in terms of townscape or impact on heritage assets. A proposal-specific analysis must be undertaken in accordance with other policies in the development plan.

- Height sensitive edge
- Potentially appropriate location for tall buildings
- Potentially appropriate for tall building to mark station
- Linear area potentially appropriate for tall buildings to front major infrastructure
- Potentially appropriate for tall buildings enabling industrial intensification only
- Maximum height within area
- xx Location reference number
- Train / Underground Station
- Major Centre
- District Centre
- Large Local Centre
- Conservation Area
- Registered Parks and Gardens
- Listed Building
- O Local Heritage Asset (2018)
