

Health and Wellbeing Information – Joint Strategic Needs Assessment (JSNA)

This leaflet has some key facts from Enfield's JSNA. The JSNA is a collection of information about the health and wellbeing needs of the local population, including where health inequalities exist. The information collected in the JSNA helps to inform the way in which decisions about health, wellbeing and social care services are planned and arranged. This information is also used by the Health and Wellbeing Board to develop the borough's health and wellbeing strategy.

What is included in the JSNA?

The JSNA provides information about Enfield including the extent of particular issues affecting the health of Children, Young People and their Families, Adults and Older People. In many cases it provides detailed analysis of a particular issue as well as what it may look like in future years.

An online resource

This information has been produced as an online resource so information can be removed and replaced easily, ensuring we provide the most up to date information.

Free internet access is available at all libraries in Enfield, Enfield Civic Centre, John Wilkes House and the Edmonton Centre.
