3. BACKGROUND

NHS Shared Planning Guidance 16/17-20/21 outlines a new approach to help ensure that health and care services are planned by place rather than around individual institutions.

As in previous years, NHS organisations are required to produce individual Operational Plans for 2016/17. In addition, every health and care system will work together to produce a multi-year Sustainability and Transformation Plan (STP), showing how local services will evolve and become sustainable over the next five years – ultimately delivering the Five Year Forward View vision.

To do this, local health and care systems will come together into STP 'footprints'. The health and care systems within these geographic footprints will work together to narrow the gaps in the quality of care, their population's health and wellbeing, and in NHS finances.

Local health and care organisations have agreed to work across the North Central London (NCL) STP geographic footprint to develop an agreed STP.

The slides attached detail how this work is progressing.
