# Public Voice Dashboard

## Introduction to the new Public Voice dashboard

### Measuring the things that matter

The new Police and Crime plan establishes an innovative approach to measuring what success looks like for London. Instead of rigid city-wide targets, we are proposing that **police and crime priorities are best set locally** and based upon evidence.

To support the local decision making around victim care and public opinion, MOPAC have developed this new Public Voice Dashboard that focuses on **public perceptions and victim satisfaction** with the Metropolitan police service. This dashboard enables the **tracking of victim satisfaction and public perceptions** over time (at a rolling 12 months level) and identifies whether these indicators have shifted over time. It focuses on the identified key drivers of satisfaction and actionable key behaviours for neighbourhood officers and also focuses on inequalities observed towards victim satisfaction and public perceptions.

The Crime Dashboard release is an output adhering to our voluntary application of the Code of Practice for Official Statistics. This output is produced to the highest standards and free from interference. It has been produced by analysts and researchers working in the MOPAC Evidence and Insight Team in accordance with the GLA 'Statement of voluntary compliance with the Code of Practice for Official Statistics (2018)' which covers our policies on revisions and other matters. The Evidence and Insight Manager (MOPAC) as Lead Official, oversees all MOPAC products that apply to our voluntary application of the code, being responsible for their timing, content and methodology.
