

**Conservation Advisory Group**  
**3<sup>rd</sup> September 2019**  
**Public Trees**  
**Andy Robinson**

Following are the issues that members would like Andy to include in his address;

### **General background**

- Enfield's policy on public trees generally and highway trees specifically
- Approximately how many trees are there in the public realm
- Is there an up to date register
- Andy's area of responsibilities (highway, public buildings, parks etc)
- Human resources to manage the estate
- Inspection regime for the estate (is there a requirement to inspect all the trees in, say, a 5 year period)
- Safety criteria
- How much is in the budget (2019/20) for new & replacement planting
- How are priorities for planting determined
- TPO's (or safeguarding important trees) particularly when an Enfield asset is sold
- Criterion and agreement to tree removal (compared to the procedure for private tree removal)
- Management of Enfield's subcontractors
- Current disease risks
