Subject: Sonny the snail CIC

Hi Christina, in regards to our conversation I would like to explain who we are and what we do. Sonny the snails sensory garden is a non profit community project registration number 12342772, we have built this garden for all members of our community to learn, enjoy, relax and get muddy. it is specifically intended for those with autism and sensory deprivation in a relaxed, quiet and safe environment. we currently have schools attending sessions in the garden and have built a grow and keep plot for those whom wish to learn to grow, this is particular helpful for families with no budget for fresh fruit and veg and those with no garden. if we could attend the PEDSA meeting tomorrow at 10am at civic centre we will be extremely grateful as we do not have any involvement with the current situation happening at PEDSA

many thanks
kari payne
