**THIS IS A GUIDE OF CONSIDERATIONS FOR A RISK ASSESSMENT FOR COVID-19, BUT HEADTEACHERS MUST CONSIDER THE WORK ACTIVITIES AND ENVIRONMENT IN THEIR SCHOOLS TO UNDERTAKE THEIR OWN RISK ASSESSMENT**

**NOTES:**

As an employer, you must protect people from harm. This includes taking **reasonable steps** to protect your workers and others (pupils, visitors, contractors, delivery staff) from coronavirus. This is a COVID-19 model risk assessment and it'll help you manage risk and protect people. Applying the risk assessment process for COVID 19 requires that you must:

- identify what work activity or situations might cause transmission of the virus
- think about who could be at risk
- decide how likely it is that someone could be exposed
- act to remove the activity or situation, or if this isn't possible, control the risk

This model risk assessment is designed to fulfil those requirements and is in line with the recommended process using the Health and Safety Executive's (HSE) approach as laid down in their 'Five Steps to Risk Assessment' This is a step-by-step process for controlling health and safety risks caused by hazards in the workplace- in this to reduce risks from COVID 19.

You can use this document to help you make sure you have covered what you need to do to keep teachers, workers, pupils and others safe. Once you have completed your risk assessment you will also have to monitor to make sure that what you have put in place is working as expected.

**The Layout**

This risk assessment is laid out in two sections; ‘ Part 1 – General Risk Assessment for School and ‘ Part 2 – School Settings’.

This document model aims to look at and use guidance and advice from authoritative sources, in this case the HSE and UK GOV. (DofE).

Part 1 – General Risk Assessment for School, is taken from the HSE’s general guidance on risk management and example risk assessment for COVID 19. The content in this section is taken directly from the HSE model and points raised are recommended areas to cover in all workplaces. By checking through this it will enable you to; make sure you are looking at areas or groups that may not be necessarily covered in a straightforward school risk assessment, provide assessment for non-school activity e.g. building work etc, and can be used to consider if it can be applied to your school setting.

Part 2- School Settings, is as stated and is specifically centred on normal school operation. The information here is sourced from UK GOV documents and the links for these are listed in the main body and on the left of this document.

**LEGAL REQUIREMENT**

The legal requirement in a nutshell is to reduce risk ‘as low as reasonably practicable’ (ALARP). You are required to do this using risk assessment and this document provides a model process for this. By so doing you are also meeting with the strong moral obligations to reduce risk in a school environment.

<p><b>Travelling to and from school</b></p>		<p>because they are dual registered at a mainstream school and an alternative provision setting or special school) schools should work through the system of controls collaboratively, enabling them to address any risks identified and allowing them to jointly deliver a broad and balanced curriculum for the child.</p> <p>Consider staggered starts or adjusting start and finish times to keep bubbles apart as they arrive and leave school (without reducing overall teaching time).</p> <p>If pupils or staff wear face coverings when they arrive at school, they must be instructed not to touch the front of their face covering during use or when removing them. They must wash their hands immediately on arrival (as is the case for all pupils), dispose of temporary face coverings in a covered bin or place reusable face coverings in a plastic bag they can take home with them, and then wash their hands again before heading to their classroom. Guidance on <a href="#">safe working in education, childcare and social services</a> provides more advice.</p> <p>Identify staff groups of workers who travel to work together and group them into bubble. Staff should be discouraged from sharing vehicles unless part of the same bubble.</p>
